

Lead a sustainable value chain

We have already achieved 77% sustainable fruit supply, including our own and third-party fruit. All our farms are certified Gold by the SAI Platform, operating with the best practices in terms of respect for the environment and decent working conditions.

The goal of moving forward in the same direction with our partner producers continues. Through the Trilhar Program, we will unite knowledge and support to have a supply chain that generates a positive impact for everyone, reinforcing our commitment to leading the sustainable value chain, capable of generating benefits for all.

By 2030
We will reach

**100% supply
of sustainable
fruit**

including our own fruit
and that of partner
producers.
